

**REVISED SUMMARY OF THE FINANCIAL IMPACT OF THE
PROPOSED SUNOCO PARTNERS NGL FACILITIES LLC PROJECT
ON THE FINANCES OF THE NEDERLAND INDEPENDENT SCHOOL
DISTRICT UNDER A REQUESTED CHAPTER 313 PROPERTY
VALUE LIMITATION**

July 15, 2013

Final Report (Revised)

PREPARED BY

Revised Summary of the Financial Impact of the Proposed Sunoco Partners NGL Facilities LLC Project on the Finances of the Nederland Independent School District Under a Requested Chapter 313 Property Value Limitation

Introduction

Sunoco Partners NGL Facilities LLC (Sunoco Logistics) has requested that the Nederland ISD Independent School District (NISD) consider granting a property value limitation under Chapter 313 of the Tax Code, also known as the Texas Economic Development Act. In an application submitted to NISD on March 25, 2013, Sunoco Logistics proposes to invest \$320 million to construct a new natural gas liquids manufacturing project in NISD. The original application was amended on July 12, 2013. This revised report reflects several changes made in Schedule B that is included in the amended application.

The Sunoco Logistics project is consistent with the state's goal to "encourage large scale capital investments in this state." When enacted as House Bill 1200 in 2001, Chapter 313 of the Tax Code granted eligibility to companies engaged in manufacturing, research and development, and renewable electric energy production to apply to school districts for property value limitations. Subsequent legislative changes expanded eligibility to clean coal projects, nuclear power generation and data centers, among others.

Under the provisions of Chapter 313, NISD may offer a minimum value limitation of \$30 million. The provisions of Chapter 313 call for the project to be fully taxable in the 2014-15 and 2015-16 school years. Beginning with the 2016-17 school year, the project would go on the local tax roll at \$30 million and remain at that level of taxable value for eight years for maintenance and operations (M&O) taxes.

The full taxable value of the project would be assessed for debt service taxes on voter-approved bond issues throughout the limitation period, with NISD currently levying a \$0.065 per \$100 I&S tax rate. The taxable value of the investment is expected to reach \$271 million in the 2015-16 school year, representing an approximate 12.4 percent increase in the District's base taxable value for I&S purposes. After its peak value year, depreciation is expected to reduce the taxable value of the project over the course of the value limitation agreement and beyond.

In the case of the Sunoco Logistics project, the agreement calls for a calculation of the revenue impact of the value limitation in years 3-10 of the agreement, under whatever school finance and property tax laws are in effect in each of those years. Under current law, NISD would experience a revenue loss of \$2.45 million as a result of the implementation of the value limitation in the 2016-17 school year. No out-year revenue losses are anticipated.

Under the assumptions outlined below, the potential tax benefits under a Chapter 313 agreement could reach an estimated \$15.6 million over the course of the agreement. This amount is net of any anticipated revenue losses for the District.

School Finance Mechanics

Under the current school finance system, the property values established by the Comptroller's Office that are used to calculate state aid and recapture lag by one year, a practical consequence of the fact that the Comptroller's Office needs this time to conduct its property value study and the planned audits of appraisal district operations in alternating years. A taxpayer receiving a value limitation pays M&O taxes on the reduced value for the project in years 3-10 and receives a tax bill for I&S taxes based on the full project value throughout the qualifying and value limitation periods (and thereafter). The school funding formulas use the Comptroller's property values that reflect a reduction due to the property value limitation in years 4-11 of the agreement as a result of the one-year lag in property values.

The third year is often problematical financially for a school district that approves a Chapter 313 value limitation. The implementation of the value limitation often results in a revenue loss to the school district in the third year of the agreement that would not be reimbursed by the state, but require some type of compensation from the applicant under the revenue protection provisions of the agreement. In years 4-10, smaller revenue losses would be anticipated when the state M&O property values are aligned at the minimum value established by the Board on both the local tax roll and the corresponding state property value study.

Under the HB 1 system adopted in 2006, most school districts received additional state aid for tax reduction (ASATR) that was used to maintain their target revenue amounts established at the revenue levels under old law for the 2005-06 or 2006-07 school years, whichever was highest. In terms of new Chapter 313 property value limitation agreements, adjustments to ASATR funding often moderated the impact of the reduced M&O collections as a result of the limitation, in contrast with the earlier formula-driven finance system.

House Bill 3646 as enacted in 2009 created more "formula" school districts that were less dependent on ASATR state aid than had been the case previously. The formula reductions enacted during the First Called Session in 2011 made \$4 billion in reductions to the existing school funding formulas for the 2011-12 and 2012-13 school years. For the 2011-12 school year, across-the-board reductions were made that reduced each district's students in weighted average daily attendance (WADA) count and resulted in an estimated 781 school districts still receiving ASATR to maintain their target revenue funding levels, while an estimated 243 districts operated directly on the state formulas. For the 2012-13 school year, the changes called for smaller across-the-board reductions and funding ASATR-receiving target revenue districts at 92.35 percent of the level provided for under the existing funding formula, with 689 districts operating on formula and 335 districts still receiving ASATR funding.

Senate Bill 1 and House Bill 1025 as passed by the 83rd Legislature made significant increases to the basic allotment and other formula changes by appropriation. The ASATR reduction percentage is increased slightly to 92.63 percent, while the basic allotment is increased by \$325 and \$365, respectively, for the 2013-14 and 2014-15 school years. A slight increase in the guaranteed yield for the six cents above compressed—known as the Austin yield—is also included. With the basic allotment increase, it is estimated that approximately 300 school districts will still receive ASATR in the 2013-14 school year and 273 districts would do so in the 2014-15

school year. Current state policy calls for ASATR funding to be eliminated by the 2017-18 school year.

In the case of NISD, it is classified as a formula school district and has not received ASATR funds in recent years. The District's target revenue is \$4,827 per WADA at its compressed tax rate of \$0.98 per \$100, about \$400 less than the state average, generating little need for hold-harmless funds as a result. Based on the estimates presented below, BISD is not expected to receive future ASATR funds with or without the value limitation in place.

One concern in projecting into the future is that the underlying state statutes in the Education Code were not changed in order to provide these funding increases. All of the major formula changes were made by appropriation, which gives them only a two-year lifespan unless renewed in the 2015 legislative session. Despite this uncertainty, it is assumed that these changes will remain in effect for the forecast period for the purpose of these estimates, assuming a continued legislative commitment to these funding levels in future years.

A key element in any analysis of the school finance implications is the provision for revenue protection in the agreement between the school district and the applicant. In the case of the Sunoco Logistics project, the agreement calls for a calculation of the revenue impact of the value limitation in years 3-10 of the agreement, under whatever school finance and property tax laws are in effect in each of those years. This meets the statutory requirement under Section 313.027(f)(1) of the Tax Code to provide school district revenue protection language in the agreement.

Underlying Assumptions

There are several approaches that can be used to analyze the future revenue stream of a school district under a value limitation. Whatever method is used, a reasonable analysis requires the use of a multi-year forecasting model that covers the years in which the agreement is in effect. The Chapter 313 application now requires 15 years of data and analysis on the project being considered for a property value limitation.

The general approach used here is to maintain static enrollment and property values in order to isolate the effects of the value limitation under the school finance system. The SB 1 and HB 1025 basic allotment increases are reflected in the underlying models. With regard to ASATR funding, the 92.63 percent reduction enacted for the 2013-14 school year and is maintained until the 2017-18 school year. A statement of legislative intent was adopted in 2011 to no longer fund target revenue by the 2017-18 school year, so that change is reflected in the estimates presented below. The projected taxable values of the Sunoco Logistics project are also factored into the base model used here in order to simulate the financial impact of constructing the project in the absence of a value limitation agreement. The impact of the limitation value for the proposed Sunoco Logistics project is isolated separately and the focus of this analysis.

Student enrollment counts are held constant at 4,746 students in average daily attendance (ADA) in analyzing the effects of the Sunoco Logistics project on the finances of NISD. The District's local tax base reached \$2.1 billion for the 2012 tax year and is maintained at that level for the forecast period in order to isolate the effects of the property value limitation. An M&O tax rate of \$1.04 per \$100 is used throughout this analysis. NISD has estimated state property wealth per weighted ADA or WADA of approximately \$341,367 for the 2013-14 school year. The

enrollment and property value assumptions for the 15 years that are the subject of this analysis are summarized in Table 1.

School Finance Impact

School finance models were prepared for NISD under the assumptions outlined above through the 2028-29 school year. Beyond the 2014-15 school year, no attempt was made to forecast the 88th percentile or Austin yield that influence future state funding beyond the projected level for that school year. In the analyses for other districts and applicants on earlier projects, these changes appeared to have little impact on the revenue associated with the implementation of the property value limitation, since the baseline and other models incorporate the same underlying assumptions.

Under the proposed agreement, a model is established to make a calculation of the “Baseline Revenue” by adding the value of the proposed Sunoco Logistics facility to the model, but without assuming that a value limitation is approved. The results of this model are shown in Table 2.

A second model is developed which adds the Sunoco Logistics value but imposes the proposed property value limitation effective in the third year, which in this case is the 2016-17 school year. The results of this model are identified as “Value Limitation Revenue Model” under the revenue protection provisions of the proposed agreement (see Table 3). A summary of the differences between these models is shown in Table 4.

Under these assumptions, NISD would experience a revenue loss of \$2.45 million as a result of the implementation of the \$30 million value limitation in the 2016-17 school year. The revenue reduction results from the mechanics of the up to six cents beyond the compressed M&O tax rate equalized to the Austin yield or not subject to recapture, which reflect the one-year lag in value associated with the state property value study. While Sunoco Logistics is expected to receive \$2.37 million in M&O tax savings when the \$30 million limitation takes effect, there are no state formula changes offsetting this reduction until the 2017-18 school year. In addition to the reduction in M&O taxes, NISD would also see an \$83,765 reduction in Tier II state aid in the initial year the limitation takes effect.

The Comptroller’s state property value study has a significant influence on these calculations, beginning in the 2017-18 school year. At the school-district level, a taxpayer benefiting from a property value limitation has two property values assigned by the local appraisal district for their property covered by the limitation: (1) a reduced value for M&O taxes, and (2) the full taxable value for I&S taxes. Two state property value determinations are also made for school districts granting Chapter 313 agreements, consistent with local practice, but reflecting the one-year lag. A consolidated single state property value had been provided previously.

Impact on the Taxpayer

Table 5 summarizes the impact of the proposed property value limitation in terms of the potential tax savings under the property value limitation agreement. The focus of this table is on the M&O tax rate only. As noted previously, the property is fully taxable in the first two years under the agreement. A \$1.04 per \$100 of taxable value M&O rate is assumed in 2012-13 and thereafter.

Under the assumptions used here, the potential tax savings from the value limitation total \$15.5 million over the life of the agreement. In addition, Sunoco Logistics would be eligible for a tax credit for M&O taxes paid on value in excess of the value limitation in each of the first two

qualifying years. The credit amount is paid out slowly through years 4-10 due to statutory limits on the scale of these payments over these seven years, with catch-up payments permitted in years 11-13. The tax credits are expected to total approximately \$2.5 million over the life of the agreement, with no unpaid tax credits anticipated. The school district is to be reimbursed by the Texas Education Agency for the cost of these credits.

The key NISD revenue losses are expected to total approximately \$2.45 million over the course of the agreement. In total, the potential net tax benefits (inclusive of tax credits but after hold-harmless payments are made) are estimated to reach \$15.6 million over the life of the agreement.

Facilities Funding Impact

The Sunoco Logistics project remains fully taxable for debt services taxes, with NISD currently levying a \$0.065 per \$100 I&S tax rate. The value of the Sunoco Logistics project is expected to depreciate over the life of the agreement and beyond, but full access to the additional value is expected to increase the District's projected I&S tax base by 12.4 percent in the project's peak value year.

The Sunoco Logistics project is not expected to affect NISD in terms of enrollment. When the project begins operation, 16 new full-time positions are assumed, based on the information application. Continued expansion of the project and related development could result in additional employment in the area and an increase in the school-age population, but this project is unlikely to have much impact on a stand-alone basis.

Conclusion

The proposed Sunoco Logistics natural gas liquids manufacturing project enhances the tax base of NISD. It reflects continued capital investment in keeping with the goals of Chapter 313 of the Tax Code.

Under the assumptions outlined above, the potential tax savings for the applicant under a Chapter 313 agreement could reach an estimated \$15.6 million. (This amount is net of any anticipated revenue losses for the District.) The additional taxable value also enhances the tax base of NISD in meeting its future debt service obligations.

								Credits paid		\$2,507,440		
								Excess Credits Unpaid		<u>\$2,507,440</u>		
												\$0

***Note:** School District Revenue-Loss estimates are subject to change based on numerous factors, including legislative and Texas Education Agency administrative changes to school finance formulas, year-to-year appraisals of project values, and changes in school district tax rates. One of the most substantial changes to the school finance formulas related to Chapter 313 revenue-loss projections could be the treatment of Additional State Aid for Tax Reduction (ASATR). Legislative intent is to end ASATR in 2017-18 school year. Additional information on the assumptions used in preparing these estimates is provided in the narrative of this Report.
